

## GROUP LICENSE SUMMARY

**DISCLAIMER:** This is not a license. This is a summary of DigitalGlobe’s Group License that highlights its key terms. Please read the full Group License text for the exact (and legally binding) terms that apply.

### You can license DigitalGlobe products pursuant to a GROUP LICENSE if:

- You represent a legal entity, such as a company, that wants to share the Product with its affiliate entities for internal purposes only; or
- You represent a government agency that wants to share the Product with other agencies in the same government for internal purposes only.

**Sharing:** You can share the Product with up to 4 of your affiliates or related agencies under a “Group License 1 to 5” or with an unlimited number of your affiliates or related agencies under a “Group License >5.”

### Under a GROUP LICENSE, you and your authorized users are free to:

- develop derivatives of the Product by formatting, editing, digitizing and/or combining with other data; or extracting geographic features, human-made features, persons or animals and related data via identification, measurement, and/or analysis; and
- store, access and reproduce the Product and derivatives.

**Unlimited Authorized Users:** You can let an unlimited number of your employees and contractors, and an unlimited number of the employees and contractors of your affiliates or related agencies, use the Product.

**Online Display.** You may also display an extract of the product or a derivative on a website in a non-extractable and non-downloadable format. However, Information Products may not be displayed online.

### For internal use only:

- You may only use the products and derivatives for your internal purposes, and the internal purposes of your affiliates or related agencies.
- You may not use the products or derivatives for commercial purposes. Commercial purposes include publishing, reselling, or using on behalf of another company.

### Data Derivatives can be used for all uses:

- “Data Derivatives” are a specific type of derivative that you are permitted to use for any and all purposes.
- Generally, Data Derivatives are derivatives that do not contain source data, and which are irreversible and uncoupled from the source product.
- Different Products specify different types of Data Derivatives. Check the Group License for details.

### With no right to share:

- You may not share the Product or derivatives outside your legal entity and your group members.

### For the term you choose:

- Your license can be perpetual or for a one-year term (which can be renewed annually).
